Care and Maintenance: Applied Finish

The life of an applied lacquered finished is limited and cannot be guaranteed. It will show signs of aging and colour change during use. To protect products from oxidizing (changing color) we apply a high-quality matte lacquer. The lacquer is vulnerable to sharp metal objects such as rings. We cannot guarantee products against sharp metal contact.

Colour variants:

We will endeavor to maintain consistency in each batch. Due to the procedures required for the finishes however, there may be a slight difference in tone. Please clean regularly with warm soapy water and a clean cloth only.

**DO NOT USE ABRASIVE OR
CHEMICAL CLEANERS**
